

# The Recruitment Process

How a headcount request becomes a new employee inside the Relay Express HRMS — every screen, every handoff, every approval gate, end to end.

**System** Relay Express HRMS    **Menu** Recruitment Process    **Prepared for** HR Leadership    **Status** Live in production

---

## § Overview

The Recruitment module carries a candidate through four connected phases — **Requisition & Sourcing, Screening & Interview, Offer & Approval, and Onboarding & Conversion** — with every step logged against a single Candidate Application record. Nothing is re-entered twice: the same application record carries the resume score into the interview, the interview outcome into the offer, and the accepted offer into the new employee's master record.

Two things make this a closed loop rather than a set of disconnected forms: an automatic **Candidate Pipeline** that timestamps every stage transition (so "where is this candidate right now" is always a live answer, not a status someone has to remember to update), and an **Employee Conversion** step that turns an accepted offer directly into a real login and payroll record — no re-typing the candidate's details into Employee Master.

## § Process flow

One candidate's path from requisition to joining. Diamonds are decision points — approve/reject, accept/decline — everything else is a screen in the system.

- Requisition & sourcing
  Screening & interview
  Offer & approval
  Onboarding & conversion
- Successful close
  Exit point

## 1 Requisition & sourcing

From "we need to hire" to an open application in hand.

### **START** Manpower Requisition

A manager raises a headcount request — new position or replacement — which routes through the existing requisition approval chain. Once approved, it becomes the authorization to open one or more Job Positions against it.

Manpower Requisition

Requisition Approval Status

### Job Position Master

Recruiter turns the approved requisition into a concrete position: designation, department, branch, grade, salary band, required/preferred skills, experience and education thresholds, and who owns it (recruiter + hiring manager). One requisition can open several positions.

Job Position Master

## Job Posting

The position is published — internally, externally, or both — with its own description, responsibilities and benefits copy, and a live/expiry window. Posting channels (LinkedIn, Naukri, Indeed, Referral) are tracked per posting.

Job Posting

## Candidate Application

A candidate's profile — contact details, current role, experience, expected CTC, resume — is captured against a specific posting. The moment an application is saved, two things fire automatically: a duplicate check (by email, phone, or resume file) and the resume screening below.

Candidate Applications

## 2 Screening & interview

Where the field narrows to a shortlist, and the shortlist is put in front of the panel.

### Resume Screening

Automatic

Every application is scored the instant it's submitted — a transparent, rule-based match against the position's requirements, not a black-box AI model:

| FACTOR           | WEIGHT | HOW IT'S SCORED                                                                                                                               |
|------------------|--------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Skill match      | 50%    | Required skills count for 80% of this factor, preferred skills the remaining 20% — both by direct overlap with the candidate's listed skills. |
| Experience match | 30%    | Full marks inside the position's min-max experience band; a sliding penalty the further outside that band the candidate falls, either way.    |
| Education match  | 20%    | Full marks at or above the position's minimum education level, half marks below it.                                                           |

The weighted total becomes a recommendation: **Strong Match** at 75+, **Moderate Match** at 50–74, **Weak Match** below 50 — visible to the recruiter alongside exactly which required skills matched and which are missing.

## Candidate Pipeline

A drag-and-drop board per position, moving each application through the stages listed in Pipeline Stages below. Every move is timestamped with who made it and why — a full, unbroken audit trail from "Applied" to wherever the candidate ends up.

Candidate Pipeline

## Interview Scheduling & Feedback

Rounds are scheduled on a calendar with a panel of one or more employees assigned per round. Each panelist submits their own feedback — technical, communication, problem-solving and overall ratings, strengths, weaknesses, and a Hire/No-Hire recommendation — which rolls up into a consolidated view per candidate.

Interview Scheduling

My Interviews (ESS)

Panelists submit feedback from their own **My Interviews** screen — they never need access to the Admin recruitment screens.

## Selection Decision

The hiring team records a formal outcome — Selected, On Hold, or Rejected — with remarks, closing the loop on the interview stage before an offer is built.

## 3 Offer & approval

Turning a selection decision into a signed-off, delivered offer.

### Salary Structure Master

Setup, ongoing

HR maintains reusable CTC templates here — independent of any single offer. Each template is a named list of components (Basic, HRA, Special Allowance, Employer PF, Joining Bonus, ...), each defined as a % of CTC, a % of Basic, or a flat amount. One template can be reused for every offer at a given grade or designation.

Salary Structure Master

## Offer Management — CTC Builder

The recruiter picks a candidate's application, applies a salary template, and enters the Final CTC — the system computes the full monthly/annual breakup live before anything is saved, and flags whether the figure is within the position's approved budget band.

Offer Management

## Offer Approval

Configurable chain

Every offer routes through an admin-configured, multi-level approval chain before it can be released. Two levels resolve automatically from the job position itself — the **Recruiter** and **Hiring Manager** on record — and any number of additional fixed-approver levels (HR Manager, Finance, Leadership, ...) can be added. Each level has its own escalation window; overdue approvals are automatically flagged.

Offer Management

Offer Approval Config

Offer Approvals (ESS)

Approvers action their level from **Offer Approvals** in their own Employee panel — no Admin access required.

## Offer Letter

Once approved and released, the letter is rendered on demand from the offer's live data — position, CTC breakup, joining date — so what's shown always matches the current record, not a stale copy. It can be downloaded as a PDF or emailed directly to the candidate from the same screen.

Offer Management

## Candidate Response

The candidate's decision — Accepted or Declined — is recorded against the offer. An acceptance automatically advances the pipeline to Offer Accepted and unlocks onboarding; a decline closes the loop without touching downstream steps.

## 4 Onboarding & conversion

Everything that has to be true before an accepted candidate becomes an employee.

## Document Collection

Candidates submit ID, address, education, and financial documents against a maintained list of document types (PAN, Aadhaar, Photo, Bank Passbook, Education Certificates are mandatory by default; Passport, Driving Licence, prior-employer paperwork are optional). Each document is individually marked Pending, Verified, or Rejected by HR.

Candidate Onboarding

Document Type Master

## Background Verification

One row per check — PAN, Aadhaar, Education, Employment, Address, Police/Criminal, and an optional Medical — each tracked through a vendor, with its own status, proof document, and completion date.

Candidate Onboarding

## Onboarding Checklist & Employee Conversion

A single sign-off checklist gates the final step — see the exact gate conditions below. Once every condition is met, one action creates the employee record: generates the employee code, assigns login credentials, creates the salary allowance record, advances the pipeline to Joined, and emails the new employee their welcome details and temporary password.

Candidate Onboarding

## § Pipeline stages

The full set of stages a candidate application can occupy, in order. Two are terminal — the pipeline stops moving once a candidate reaches Joined or Rejected.

| #   | STAGE               | CATEGORY  |          |
|-----|---------------------|-----------|----------|
| 10  | Applied             | Sourcing  |          |
| 20  | Screening           | Screening |          |
| 30  | Shortlisted         | Screening |          |
| 40  | Interview Scheduled | Interview |          |
| 50  | Interview Round 1   | Interview |          |
| 60  | Technical Round     | Interview |          |
| 70  | HR Round            | Interview |          |
| 80  | Management Round    | Interview |          |
| 90  | Selected            | Offer     |          |
| 100 | Offer Released      | Offer     |          |
| 110 | Offer Accepted      | Offer     |          |
| 120 | Joined              | Closure   | Terminal |
| 999 | Rejected            | Closure   | Terminal |

## § Conversion checklist

All six conditions must be signed off before the "Convert to Employee" action will run.

### Required to convert

- ✓ Offer accepted, confirmed
- ✓ Background verification complete
- ✓ Joining approved
- ✓ Documents complete
- ✓ Salary approved
- ✓ Employee creation approved

Medical clearance is tracked on the same checklist but does not block conversion — it's recorded as informational, not a hard gate.

## § Roles & responsibilities

### Recruiter

- Opens positions & postings
- Reviews applications & screening scores
- Schedules interviews
- Builds & releases offers

### Hiring Manager

- Defines position requirements
- Interview panel member
- First approval level on offers

### Interview Panelist

- Submits feedback via My Interviews
- Rates & recommends Hire / No-Hire

### HR / Approvers

- Configures the approval chain
- Approves offers via Offer Approvals
- Verifies documents & BGV
- Signs off the onboarding checklist

### Candidate

- Applies, interviews, responds to offer
- Submits onboarding documents

### System

- Scores every resume automatically
- Logs every pipeline transition
- Generates employee code & credentials
- Sends every stage's email notification

## § Menu map

Everything above lives under one sidebar group.

| MENU ITEM               | PANEL          | USED IN |
|-------------------------|----------------|---------|
| Manpower Requisition    | Admin          | Phase 1 |
| Job Position Master     | Admin          | Phase 1 |
| Job Posting             | Admin          | Phase 1 |
| Candidate Applications  | Admin          | Phase 1 |
| Candidate Pipeline      | Admin          | Phase 2 |
| Interview Scheduling    | Admin          | Phase 2 |
| My Interviews           | Employee (ESS) | Phase 2 |
| Salary Structure Master | Admin          | Phase 3 |
| Offer Management        | Admin          | Phase 3 |
| Offer Approval Config   | Admin          | Phase 3 |
| Offer Approvals         | Employee (ESS) | Phase 3 |
| Candidate Onboarding    | Admin          | Phase 4 |
| Document Type Master    | Admin          | Phase 4 |
